Employer	Center for Cell-based Therapy (CTC) USP
Location	Ribeirão Preto - São Paulo (Brazil), Rua Tenente Catão Roxo, 2501, Monte Alegre.
Salary	The successful candidate will be awarded with a FAPESP postdoctoral fellowship ( <a href="http://www.fapesp.br">www.fapesp.br</a> ).
Posted	November 10 2016
Discipline	<a href="#">Life Sciences</a> , <a href="#">Biology</a> , <a href="#">Biotechnology</a> , <a href="#">Cancer Research</a> , <a href="#">Cell Biology</a> , <a href="#">Genetics</a> , <a href="#">Genomics</a> , <a href="#">Immunology</a> , <a href="#">Molecular</a>

A postdoctoral position is available in the field of Stem Cell Biology and Hematology at Center for Cell-based Therapy (CTC). CTC is located at the Regional Hemotherapy Center of the Faculty of Medicine of Ribeirão Preto (University of São Paulo – USP). CTC is a part of the Program of Research, Innovation and Dissemination supported by FAPESP (Fundação de Amparo à Pesquisa do Estado de São Paulo).

The research at CTC focuses in stem biology and translational medicine with a multidisciplinary and collaborative efforts: I) to understand stem cell biology, highlighting pluripotent stem cells (embryonic and induced pluripotent stem cell) and somatic stem cells; II) to establish blood diseases modeling for understanding hematopoietic-cell development; III) to study the onset of hematopoiesis, particularly the earliest events leading to the specification of both normal and abnormal hematopoietic tissue; and IV) to develop protocols for pre-clinical and clinical studies.

Applications must be sent to the e-mail:

November, 30<sup>th</sup> 2016 at 18 pm (BRT).

Additional information is found at: <http://ctcusp.org>. The successful candidate will be awarded with a FAPESP postdoctoral fellowship ([www.fapesp.br](http://www.fapesp.br)).

**Position Title:** Posdoctoral Fellow in Cell-Therapy

### ITEMS REQUIRED

- The candidate should have doctoral degree

Job  
Type

Biology,  
Oncology,  
Stem Cells,  
Structural  
Biology,  
Health  
Sciences,  
Clinical  
Research  
  
Postdoc,  
Postdoc  
Fellowship

(PHD) completed;

- Highly motivated postdoctoral fellow;
- Strong interest in stem cell biology and a desire work with projects relating on normal and abnormal hematopoietic tissue;
- Previous experience in stem cell and/or hematology research, and knowledge in cell and molecular biology techniques (basic and advanced) are highly valued.
- Good written and oral English communication skills are essential.

For those interested, please send complete CV (2 pages max), a letter of motivation (1 page max. including research statement describing past achievements, skills and research interests), and two letters of recommendation with respective contact information of the reference until November, 30<sup>th</sup> 2016
